Think About Your Winter Break..

its, moods, or g

I personally was really bored out of my mind during break. I didn't quite do anything besides Playing roblox, maybe doing pushups, and texting my boyfriend while watching Youtube. I Played with my dog for a bit, I would also hangout with my boyfriend sometimes, and go to church during sundays. I was bored, sad, and happy at times. But mainly bored so much I wanted school to start Already.

Track 1 - Your Mood Going Into Break

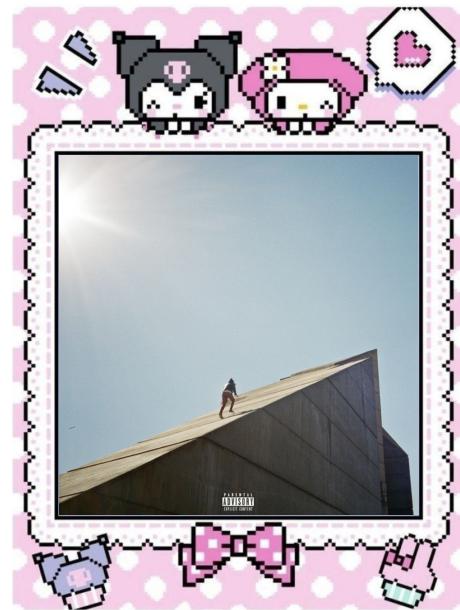

Dead to me -
Kali Uchis

I chose this song because I had to end the first semester with drama from a now ex-friend. This song really relates to the situation I had and it's a really good song as well. I feel like it really matches anything like an ex, or just someone who doesn't know you and just hates you for no reason. I can relate to it about 70% of it. Truly useful for my situation.

Track 2 - A Moment During

I chose ~~the~~ ^{Break} song because I was mainly with my boyfriend, He is the best part of my life, the only person I really need. I feel like it explains perfectly how I view him and how much he truly means to me. I'm very in love with him, was extremely happy knowing we could hangout whenever we wanted to. Really mainly the only times I left the house. Just to hangout with my boyfriend <3

Best Part - Daniel Caesar, H.E.R

Track 3 - Your Mindset Coming Back to School

Heaven sent -
Tevomontana

I think it's just a very calm music in a way. I think it kind of matches the vibe, I mean it's energetic, calm, and just a lot of stuff going on together. I personally love the song it's lovely and simply a good song to listen to every once in a while. I couldn't quite find any other song that has the whole vibes of everything going on at once energy.

Track 4 - End-of-Year

East liberty -
PARTYNEXTDOO
R

I think the vibe really matches as an Anthem for the end of the year. Mainly because of how calm it is and how it can really match any vibe. Mainly can be used when summer is over since the song is about the summer being over. This song would match more of a night time drive and while cruising around in a huge city.
